Office Action Summary	Application No. 10/076,674	Applicant(s) SOKOLL, KENNETH K.	
	Examiner N. M. Minnifield	Art Unit 1645	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under Ex Parte Quayle, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on November 19, 2010 has been entered.

2. Claims 1, 4-9, 12, 13, 18, 19 and 76-90 are pending in the instant application.

3. The IDS filed November 19, 2010 is acknowledged and has been entered. The cited references have been considered and an initialed/signed copy of IDS is attached.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1, 4-9, 76-84, 89 and 90 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lingnau et al (WO 01/54720 A1, publication date August 2, 2001).

Art Unit: 1645

Lingnau et al teaches the use of the combination of an antigen, CpG oligonucleotide and cationic peptide in a pharmaceutical composition. Lingnau et al teaches the use of poly-L-arginine (cationic peptide) and CpG-ODN 1668 (anionic CpG) synergistically enhances an immune response to an antigen contained in said composition (see example 3; see also pp. 11-13). It is noted that the disclosed CpG has the formula as set forth in claims 9 and 84. The poly-L-arginine and CpG-ODN utilized in the cited prior art is considered to fall under the definition of cationic peptide and anionic CpG oligonucleotide respectively as defined in instant claim 1. With regard to the specific pH, ratios, concentrations and particle size, it is noted that it would have been obvious to one having ordinary skill in the art at the time the invention was made to determine these values with little effort, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980). The claimed invention is prima facie obvious in view of the teachings in the prior art, absent any convincing evidence to the contrary.

7. Claims 12, 13, 18, 19 and 85-88 are objected to as they depend from a rejected claim.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. M. Minnifield whose telephone number is 571-272-0860. The examiner can normally be reached on M-F (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Helms can be reached on 571-272-0832. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
